**Gear Technology, International Precision Gear Manufacturer,
Acquires New Environmentally-Safe Aqueous Parts Cleaning System**

Rancho Cucamonga (CA) (July 6, 2009)...Gear Technology, a leading international precision gear manufacturer, has recently acquired a new environmentally-friendly ultrasonic, aqueous-based, parts cleaning system.

“This state-of-the-art system cleans machined components prior to first-article inspection points during the machining process and before final shipments are made to our customers,” Tom Marino, President said. “The multiple-tank process removes even the smallest particles and is capable of processing up to 6,000 parts per month.”

“With in-house and environmentally-responsible parts cleaning we ensure our customers’ precision machined gears and assemblies are shipped completely free of foreign object contamination and are received ready to use,” Marino confirmed.

“We are always looking for ways to better serve our customers,” Marino said. “Our new aqueous-based cleaning system is a positive addition for us to achieve a higher standard of product productivity and quality assurance.”

Gear Technology has been manufacturing quality precision gears for some of the world’s largest and most widely recognized aerospace, military and commercial manufacturers since 1986. Today the company occupies over 16,320 square feet of modern manufacturing space with state-of-the-art, computer-controlled equipment.

“Our integrated manufacturing processes, including sophisticated job tracking systems, assures products are produced with careful attention to the most intricate engineering detail and product specifications,” Marino said. “The company also offers gear blanking, engineering consultation and sophisticated inventory management services.”

Gear Technology offers Long-Term Agreements (LTAs), Kan-Ban Shipping, Just-In-Time Inventory Management, Five-Year Fixed Price Agreements, and Free Engineering Consultation to increase the Lean Manufacturing of your products. “As a result we are able machine parts more cost-effectively, save a significant amount of time in the manufacturing process, which translates to faster product turnaround for our customers,” Marino added.
