Gear Technology, International Precision Gear Manufacturer, Announces New Management Changes with Two Promotions

Rancho Cucamonga (CA) (June 16, 2010)...Gear Technology, a leading international precision gear manufacturer and related services provider, has recently announced the promotion of two senior level managers.

Joe Campa, formerly Quality Assurance Manager, has been promoted to Director of Engineering. A ten-year veteran of Gear Technology, he was previously employed with Boeing Space and Communications Group as a Procurement Quality Specialist, and has held quality management positions with Kosmo Gears and Newman Machine Works. In his new position, Campa will be responsible for the company's integrated Engineering Department.

Jerry Flores has been elevated from Quality Assurance Representative to Quality Manager. His new management responsibilities will include the implementation and maintenance of the company's ISO9001:2008/AS9100 AMS quality standards, inspection, employee training, safety, internal and external audits, performance monitoring and lean manufacturing.

"We are pleased to recognize the dedication and performance of these two long-term employees who have demonstrated their commitment to the company's business goals and customer service value standards," Tom Marino, President, said in making the announcement.

Gear Technology has been manufacturing quality precision gears for some of the world's largest and most widely recognized aerospace, military and commercial manufacturers since 1986. Today the company occupies over 16,320 square feet of modern manufacturing space with state-of-the-art, computer-controlled equipment.
